

FORMULATIONS OF MOMETASONE AND A BRONCHODILATOR
FOR PULMONARY ADMINISTRATION

ABSTRACT OF THE DISCLOSURE

A pharmaceutical formulation is provided for pulmonary drug administration of a bronchodilator, a corticosteroid and an optional pharmaceutically acceptable carrier. In addition, methods for using the formulation to treat bronchodilator/corticosteroid-responsive conditions, diseases or disorders are provided, as are drug delivery devices and dosage forms for housing and/or dispensing the formulations.
